English basic, Git, Agile Scrum, Rasa

CERTIFICATIONS

Problem Solving (Basic) in Hackerank
Frontend Developer (React) in Hackerank
ReactJS Course in F8 Education

INTERESTS

Coding
Singing
Play football

OVERVIEW

- Just graduated from Software Engineering with excellent student grades.
- Strong experience in ReactJS and NodeJS.
- Ability to self-learn and apply new technology quickly.
- Eager to learn, hard-working, with a high sense of responsibility.
- Short-term goal: Improve skills, experience, and English.
- Long-term goals: Become a team leader to lead the team to complete projects.

EDUCATION

10/2020 - 06/2024 | Graduated

DUYTAN UNIVERSITY | CMU - Software Engineering

GPA: 3.66

WORK EXPERIENCE

03/2024 - 06/2024

D-SOFT, JSC | Internship

First Month: Training

- Learn to read and understand requirements documents.
- Learn about clean programming, performance optimization, and project structure.
- Review basic and advanced HTML, CSS, Javascript.
- Learn ReactJS and VueJS.

Two Months Later: Join the project "NFT Ecommrece"

- Participate in a real project using the VueJS, Pinia, Scss, Git, Gitlab, ...
- Analyze project documents such as Figma, SRS, Swagger
- Customize common components for reuse and perform user interface (UI) development tasks for the project.
- Cooperate with the Backend team to call the API and the DevOps team to deploy to the server
- Participate in code review and improvement meetings.

INDIVIDUAL PROJECT

09/2023 - 05/2024

THE RECRUITMENT PLATFORM SYSTEM SUPPORT WITH CHATBOT AI | Fullstack

Description: The project is an IT job recruitment platform with 3 roles: candidate, employer, admin. Candidates can search for jobs, write CVs online, interact with chatbots, send message contact and the system can scan CVs to suggest suitable candidates based on skill and experience for each position for employers.

Responsibilities: Build BE and FE, train chatbot model, write documents

Technology in use:

- Frontend: ReactJS, Material-Tailwind, RTK Query, React Hook Form
- Backend: NodeJS, ExpressJS, Socket.IO, MongoDB, JWT
- AI Model: Rasa, Python

Github Link: <https://github.com/dataiti/CMUSE450-Smart-Recruitment-System>

05/2023 - 06/2023

"CLICKSHOP" ECOMMERCE PLATFORM SYSTEM | Fullstack

Description: The project is an e-commerce platform that supports businesses and individuals selling online

Responsibilities: Build Backend, build Frontend

Technology in use:

- Frontend: ReactJS, Redux Toolkit, TailwindCSS, axios, React Hook Form
- Backend: NodeJS, ExpressJS, Socket.IO, MongoDB

Github Link: <https://github.com/dataiti/CMUCS447-Ecommerce-Platform>

And a few other projects such as Chat System, COCOMOII Tool, Meeting System
